Annex 6 Wildlife Response Centre Volunteer Registration Form

1. Background and aims

It is the responsibility of the Sullom Voe Oil Spill Advisory Committee (SVOSAC) to ensure that adequate plans exist for the area covered by the Sullom Voe Harbour Oil Spill Plan (SVHOSP) and to integrate into that plan environmental advice from the Shetland Oil Terminal Environmental Advisory Group (SOTEAG). The Wildlife Response Co-ordinating Committee (WRCC) was established in 1990 under the auspices and Chairmanship of SOTEAG to advise SVOSAC and the Sullom Voe Association Limited on policy for dealing with wildlife oiled as a result of a major oiling incident in the waters around Shetland and to establish operational procedures. The WRCC Oil Spill Plan for Shetland is incorporated into the SVHOSP and the Shetland-wide Marine Pollution Contingency Plan (MPCP). In the event of an oil pollution incident the WRCC may establish a Wildlife Response Centre, whose role would be:

- (a) to measure the impact of an oil pollution incident by the collection and recording of as many wildlife victims as is practicable, priority being given to seabirds and marine mammals.
- (b) to rehabilitate for release to the wild as many oiled birds (to be cared for by the SSPCA) and marine mammals (to be cared for by the Hillswick Wildlife Sanctuary) as is reasonable and practicable.
- (c) to provide factual information to the Incident Co-ordination Centre.
- (d) to deliver factual information to the media, through channels defined by the Incident Co-ordination Centre.

2. Membership of the WRCC

Current organisations represented on the WRCC:

- SOTEAG
 - Chairman of SOTEAG/WRCC Committees and Vice Chairman of the WRCC Committee
 - SOTEAG Executive Officer - provides administrative support to the WRCC
- Shetland Islands Council (SIC)

- Ports & Harbours Operations
- Infrastructure Services
- Legal & Administration
- BP Exploration
 - HSE Advisor, BP Sullom Voe Terminal
 - HSE Advisor, BP Sullom Voe Terminal
- Marine Scotland
 - Senior Fishery Officer
- Scottish Natural Heritage (SNH)
 - Shetland Operations Officer
- Scottish Environment Protection Agency (SEPA)
 - Environmental Protection Officer
- Royal Society for the Protection of Birds (RSPB)
 - Northern Isles Manager
- Shetland Biological Records Centre (SBRC)
 - Project Manager, Natural History
- Shetland Bird Club
 - SBC Committee Member
- Scottish Society for the Prevention of Cruelty to Animals (SSPCA)
 - Shetland Inspector
- Hillswick Wildlife Sanctuary (HWS)
 - Manager
- Westside Veterinary Surgery
 - Partner
- Northern Constabulary
 - Community Safety Sergeant

3. Activating the WRCC Plan

3.1 Circumstances

The WRCC Plan should be activated if initial assessment (see 3.2 below) of an oil pollution incident in Shetland waters suggests that one or both of the following situations is likely to occur:

- a) Comprehensive collection of dead and live victims cannot be handled by staff of the member organisations alone, so that a directed volunteer effort is required.
- b) Holding and treatment facilities in Shetland and associated professional and volunteer personnel will be unable to cope with the anticipated number of live oiled birds or mammals.

The consequence of activating the Plan is that a Wildlife Response Centre (WRC), with an identified administrative structure, would be established within 24 hours, and a full meeting of the WRCC would take place within 36 hours.

3.2 Responsibility

The decision to activate the WRCC Plan and where to locate the WRC will be taken jointly by three WRCC members, with three others acting as deputies in the event of those with primary responsibility being unavailable. These individuals currently are:

<u>Primary Responsibility</u>	<u>Depute</u>
Martin Heubeck (SOTEAG)	Kirsty North (SNH)
David Manson (SVT)	Jed Westmoreland (SVT)
Richard Cooper (SIC)	Colin Reeves (SIC)

4. Location of the Wildlife Response Centre and holding and treatment facilities

4.1 The Wildlife Response Centre (WRC)

The WRC will be located at the Sella Ness Pollution Response Base, unless the likely area of the main field effort is considered sufficiently distant to hamper

an efficient response. The WRCC will maintain an understanding of potential buildings suitable for use as a WRC, or as forward-bases for local co-ordination of field operations

The suitability of a building for use as a WRC is more important to an efficient response than its exact location. In deciding the location of a WRC in a building away from Sella Ness, the likely minimum period of occupancy and the physical layout of the building(s) should be considered. The latter should include, in no order of priority:

- a) distance from and possible disturbance to the nearest housing
- b) adequate car parking and space for a large freezer unit
- c) separate areas for administration, field control and equipment storage
- d) adequate food preparation and toilet facilities
- e) sufficient electrical and telephone points
- f) rooms convertible to sleeping accommodation
- g) control of the media

4.2 Wildlife holding and treatment facilities

All live birds/mammals will be taken directly to the respective holding and treatment centres. All dead birds/mammals will be taken to the WRC.

4.2.1 Oiled birds

The holding and treatment of live, oiled birds will, in the first instance, have to rely on establishing temporary facilities in Shetland. These will be used for the pre-treatment and stabilisation of birds (e.g. re-hydration and initial cleaning) before transfer to the SSPCA's National Wildlife Rescue Centre at Fishcross in Clackmannanshire. In instances where birds are only lightly oiled, consideration might be given to transferring them to the facilities in mainland Scotland straightaway.

The WRCC will maintain a listing of potential buildings in Shetland suitable for conversion to temporary holding and treatment facilities for oiled birds.

4.2.2 Marine mammals

The treatment and rehabilitation centre for marine mammals will be the Hillswick Wildlife Sanctuary.

5. WRC administrative structure

5.1 Key Posts

The following nine Key Posts in the WRC administrative structure will be filled by WRCC member organisations:

General Manager, Administrator, Field Operations Co-ordinator, Health and Safety Advisor, Animal Welfare Co-ordinator, Scientific Co-ordinator, Logistics Co-ordinator, Media Liaison Co-ordinator and I.T. Communications Co-ordinator.

Different oil spill incidents will require different levels of response and so the administrative structure should be regarded as flexible. The functions of two or more Key Posts may be merged, or one co-ordinator may be directed to assist another, according to circumstances and at the discretion of the General Manager.

5.2 Support for Key Posts

In more serious incidents some or all Key Posts will require assistance and/or clerical support. Assistants to and clerical support for Key Posts should, where possible, be seconded from posts in WRCC member organisations or else hired temporarily.

Different pollution incidents will impose different demands on the administration structure. The Administrator will be responsible for identifying the need for additional manpower, the resourcing of which will be the responsibility of General Manager

5.3 Filling Key Posts

The WRCC member organisations responsible for filling Key Posts, with alternates, will be:

General Manager - SOTEAG/SVT

Administrator - SOTEAG/SIC

Field Operations Co-ordinator - RSPB/SNH

Health and Safety Advisor - SIC

Animal Welfare Co-ordinator – SSPCA

Scientific Co-ordinator – SBRC/SNH

Logistics Co-ordinator - SIC/SVT

Media Liaison Co-ordinator - SVT/SIC

IT Communications Co-ordinator SIC/SVT/Contracted

Member organisations responsible for filling these Key Posts must accept responsibility for responding to the event and be aware that staff may have to be released for extended periods during more serious incidents.

5.4 Rotation of staff in Key Posts

All staff in Key Posts should be rotated between 14-21 days of the WRCC plan being in operation and this rotation will be staggered. By day 7 of the plan being in operation it should be clear whether or not it will need to run for longer than a further week. If so, it will then be the responsibility of the General Manager to alert member organisations to the need for alternative staff.

5.5 WRC funding

Once the WRCC Plan has been activated the Administrator will identify a source of immediate finance, maintain tight financial control and records, and maintain a log of staff time on duty for any subsequent compensation claims. If the WRCC Plan is activated, initial funding will be drawn from the SOTEAG Contingency Fund of £15K. The authorisation of WRC expenditure will be the responsibility of the General Manager.

6. Functions and responsibilities of Key Posts

6.1 General Manager

- Responsibility for all activities at WRC
- Ensure health and safety requirements are in place
- Authorise WRC expenditure
- Represent the WRCC on any relevant group or committee within the Emergency Response structure

- Convene daily meetings for Key Post personnel
- Act on any WRC requirement for assistance from outside Shetland
- Control offers of assistance coming from outside Shetland
- Represent the WRCC at press conferences or, if necessary, delegate to the Media Liaison Co-ordinator

6.2 Administrator

- Maintain a log of WRC activities and associated files
- Minute WRCC and Key Post staff meetings and circulate minutes
- Identify any need for additional personnel in administrative structure
- Supervise any administration staff
- Organise travel and accommodation for WRCC-authorized personnel visiting Shetland
- Oversee the register of volunteers' contact details and other personal information, and ensure its security
- Maintain financial records
- Maintain a log of staff time

6.3 Health and Safety Advisor

- Maintain, update and sign off Risk Assessments
- Ensure the standing Risk Assessment meets the requirements of the particular incident, and amend as required
- Obtain COSHH Assessment of the oil(s) involved, and ensure any particular hazards are clearly explained to the Field Operations Co-ordinator

6.4 Field Operations Co-ordinator

- Plan daily field effort based on pollution surveillance reports, and weather conditions and forecasts
- Organise teams to survey beaches for dead and live animals
- Oversee volunteer registration and Risk Assessment briefings

- Implement compliance with health and safety requirements
- Debrief and collect reports from beach survey teams on their return
- Ensure the prompt delivery of such reports to the Scientific Co-ordinator
- Evaluate the need for any additional support from outwith Shetland, including that of staff from WRCC member organisations

6.5 Animal Welfare Co-ordinator

- Oversee all operations involving live birds and marine mammals
- Evaluate the need for, and organise, the establishment of temporary holding and treatment facilities
- Evaluate the need for additional veterinary or field rescue expertise
- Evaluate the need for, and advise on, the transportation of live casualties out of Shetland
- Provide a direct link between the WRC and holding and treatment centres
- Ensure the Scientific Co-ordinator has accurate, up to date records of birds and mammals taken into care, and their fate

6.6 Scientific Co-ordinator

- Ensure proper collection, identification, labelling and storage of specimens
- Maintain a database of biological aspects of the incident
- Produce a daily summary and interpretation of field survey debrief forms
- Evaluate the need for any additional scientific expertise
- Co-ordinate requests for, and the delivery of, biological material
- Organise any post-mortems of carcasses
- Initiate and supervise any surveys to detect vulnerable concentrations of birds in the likely path of oil slicks
- Supervise any carcass-recovery or drift experiments

6.7 Logistics Co-ordinator

- Liaise with the Field Operations Co-ordinator on the requirement for field communication equipment
- Arrange all procurement and hiring of equipment and vehicles
- Organise any catering and cleaning requirements at the WRC
- Organise any freight transport requirements
- Liaise with the Administrator on financial control matters
- Liaise with the owners of the WRC building if outwith Sella Ness
- Organise any security requirements at the WRC

6.8 Media Liaison Co-ordinator

- Liaise with the media, through channels identified by the Incident Control Centre
- Initiate media appeals for volunteer assistance
- Brief field teams on appropriate responses to approaches from the media
- Maintain a file of media coverage
- Ensure a photographic record of the incident is maintained and archived
- Assist the Scientific Co-ordinator with synopses of field activities and casualty lists

6.9 IT Communications Co-ordinator

- Set up internal e-mail systems for use exclusively for WRCC members
- Establish and maintain telephone and email communications at the WRC
- Set up external e-mail facilities to facilitate internal/external communications for contact points

- Set up Internet resource and maintain incident information on the SOTEAG website
- Liaise with the Administrator over information releases
- Maintain all resources for the duration of incident

7. Administration at wildlife holding and treatment facilities

7.1 SSPCA

Administration, voluntary assistance, logistics and accurate maintenance of records of wildlife taken into care will be the responsibility of the SSPCA. If additional manpower or logistical support is required from the WRCC, the request should be relayed to the General Manager by the Animal Welfare Co-ordinator. The establishment of any temporary holding/treatment facility will be the responsibility of the SSPCA

7.2 Hillswick Wildlife Sanctuary (HWS)

Not all oil pollution incidents affecting birds will affect marine mammals and the activation of the WRCC Plan will serve to put the HWS on alert. If marine mammal casualties are anticipated or found, it is the responsibility of the HWS to request administrative, media liaison and other support from the WRC General Manager, if considered necessary. An administrator will maintain financial control and accurate records, working under the direction of HWS personnel. In the event of HWS managers being absent from Shetland, the SSPCA has the authority to enter and operate the sanctuary.

8. Stocks of equipment

8.1 Sella Ness Pollution Response Base

A stock of equipment to support field operations will be held at the Sella Ness Pollution Response Base, for immediate transfer to the WRC on activation of the WRCC Plan. Included in this stock will be items such as specially coloured plastic sacks, tight-meshed hessian sacks of sufficient size to carry large birds, a small supply of bird carrying boxes, protective clothing, plastic sheeting, etc. Wooden drift blocks will also be stored here. The Sullom Voe HSE Advisors

will maintain this stock of equipment and present a list of items held to the WRCC annually, for comment and amendment. A stock of stationery and other items for use in the initial administration of the WRC will be held in the portacabin at Sella Ness.

8.2 Shetland Biological Records Centre

A stock of equipment for use in the administration of the WRC will be held for transfer to the WRC on activation of the WRCC Plan, including:

- Appropriate software for handling the scientific database and maintaining and manipulating a register of volunteer assistance
- WRC headed forms for logging telephone calls
- Debrief forms for field teams
- Large formal posters outlining health and safety procedures
- Registration and Risk Assessment forms for volunteers
- WRCC laptop (held by SNH, Lerwick)

8.3 SSPCA: Temporary holding and cleaning facilities

It will be the responsibility of the SSPCA to hold sufficient equipment for dealing with live oiled birds in an emergency, before re-supply from the Scottish Mainland. The SSPCA will also be responsible for maintaining an adequate team of trained local volunteers to assist with the care and treatment of oiled birds.

9. Use of volunteers and specialist support organisations

9.1 Volunteers

WRCC policy will be to use local volunteer help for field operations. The SIC takes legal liability for all formally registered volunteers who have abided by field operation protocols. Volunteer assistance may be brought to Shetland if the Field Operations Co-ordinator considers it absolutely necessary. Volunteers from outwith Shetland will only be sought from bona fide organisations, on the written approval of the General Manager

9.2 Equipping and feeding volunteers

The WRCC will be responsible for ensuring that all volunteers are adequately equipped with protective clothing. Control of PPE will be organised by the Logistics Co-ordinator. Basic catering for volunteers will be provided at the WRC.

9.3 Volunteers' expenses

Volunteers may have petrol costs reimbursed if they wish, via a logging system operated by the Field Operations Co-ordinator against a WRC account. Any other requests for reimbursement of expenses should be referred to the Administrator.

The WRCC will not be responsible for any expenses incurred by any volunteer who travels to Shetland and arrives at the WRC uninvited.

9.4 Specialist support

It is the responsibility of both the Field Operations Co-ordinator and the Scientific Co-ordinator to identify any requirement for specialist support not available in Shetland and alert the General Manager to that need. Similarly, if SSPCA or Hillswick Wildlife Sanctuary requires specialist support to be brought to Shetland under WRCC authority, rather than their own, then that need should be brought to the attention of the WRC General Manager. An individual or group may only travel to Shetland under the authority of the WRCC on the formal authorisation of the General Manager. Once in Shetland, such an individual or group must operate within the WRC structure.

10. Dealing with wildlife casualties

10.1 Dead birds and other animals

All dead birds found by field teams or handed in by members of the public, both oiled and apparently clean, and those which die in care will be checked for rings and tracking devices and stored frozen at the WRC for examination at a later date. Should freezer capacity become limited, the Scientific Co-ordinator will prioritise species for disposal, onsite necropsies, or shipment out of Shetland. If field teams report abnormal mortality of fish or marine invertebrates, samples should be taken and also stored frozen. All stored biological material will be the property of the WRCC and will be used

primarily for scientific purposes. Dead marine mammals found, or those which die in care, will be forwarded to an appropriate institution for post mortem examination, or stored frozen until such time as post mortems can be carried out. The retrieval of dead seals from beaches will be organised by the Animal Welfare Co-ordinator.

10.2 Live birds

The care of all live birds found will be the responsibility of the SSPCA. All live birds found will be taken to the temporary holding and treatment facilities where they will be logged (date, place and circumstances of finding) and individually colour marked. Thereafter, birds will be transferred to the SSPCA's National Wildlife Rescue Centre for more thorough cleaning and rehabilitation. The timing of release of rehabilitated birds will be decided by the SSPCA, but the location of release will be agreed jointly between the SSPCA, SNH, RSPB and the SOTEAG Ornithologist. For example, whilst it might be appropriate to release auks and gulls at mainland Scottish locations, this would not be the case for e.g. Shetland's Eider ducks, which are genetically distinct from those in mainland Scotland. Such birds would, on rehabilitation, need to be released back in Shetland. All birds will be BTO ringed before release and any colour rings used for identification during rehabilitation will be removed. Consideration should be given to fitting released birds with rings that are readable in the field, or with geolocators, with details forwarded to the BTO. The Animal Welfare Co-ordinator will be the link between the WRCC and SSPCA rehabilitation facilities, and will be responsible for the maintenance of accurate records.

10.3 Live otters and seals

The retrieval of live otters and seals from beaches, any first aid administered, and onward transport to the Hillswick Wildlife Sanctuary (HWS) will be carried out by staff from one or more identified rescue organisations acting with WRCC authority under the direct supervision of the Animal Welfare Co-ordinator. Once at the HWS, their care will be the responsibility of the HWS, aided and advised by S/RSPCA veterinarians at the discretion of the HWS. The involvement of any other organisation will not form part of the WRCC Plan response without formal authority of the WRC General Manager

11. De-activation of the WRCC Plan

The decision to de-activate the WRCC Plan will be taken at a minuted meeting of WRCC members. Thereafter, it will be the responsibility of Key Post staff to produce a WRCC report on the incident, for submission to SOTEAG and circulation among WRCC member organisations, and eventual publication.

Revised August 2014
